

Responsiveness to the communities that I serve is why I've been in broadcasting for twenty years. At KMCQ I have woven community service into the fabric of the station culture. From employee participation in civic groups to on-air programs we are about community! Friday evenings from 6 to 8pm my son has a radio show called "All Teen Radio". On ATR youth from the area are invited in to do guest DJ appearances. They play their type of music and address youth issues. Our public file is full of correspondence from members and leaders in the community thanking KMCQ for involvement in fundraisers, news events, emergency broadcasting and on and on. Our issues and programs lists are full, each quarter, of news stories and programs that our news department has covered, issues that make a difference to those that live here not just national or fluff news. In fact our news department does not pay for itself but we have a news department because our listeners rely on us for up to date information. Our mayor and two of our county commissioners have been in and on air this past week and not because of election. We are community and yes occasionally we play music. Thankyou, John E. Huffman, VP/GM.
